WORK EXPERIENCE

Associate Technical Consultant | Salesforce, New York, NY — Aug 2021 - Present

Senior Developer | Federal Defense Project

- Led a team of 6 developers + 2 QA engineers. Ran sprint planning and story pointing, owned code review, triaged defects, and mentored developers across different teams for 20+ sprints.
- Reviewed most changes from 6-12 developers each sprint for security, naming, and design standards. Caught at least 3 issues per sprint before reaching QA and gave written feedback so developers could apply it on their own.
- Engineered reusable Cursor skills that created OmniScripts, FlexCards, and Integration Procedures seamlessly integrating into Sales, Service, and Experience Cloud environments. This reduced component development time from 2–3 days to under 6 hours with review of generated output.
- Presented high-visibility sprint demos to client stakeholders, maintaining alignment and accelerating feedback loops.
- Mentored an Admin into Developer-level work by pair programming until they could clear Developer stories independently, adding to team velocity/capacity.

Senior Developer | National Financial Project

- Delivered a high-quality, scalable solution using OOTB OmniStudio components and custom code that serviced up to 80,000+ transactions per month.
- Mentored and led debugging lessons for fellow engineers, improving their ticket close times by 1-2 points.
- Created and maintained technical documentation, reducing onboarding time by ~25%.
- Improved page load performance by 30% by successfully refactoring legacy Aura/VF code to modern LWC standards.
- Collaborated with the Copado DevOps team to identify, troubleshoot, and implement solutions, minimizing CI/CD pipeline downtime and ensuring efficient deployments.
- Designed protected API callouts with Apex / Named Credentials while achieving 95%+ code coverage during unit and integration testing.

Developer | Multinational Insurance Project

- Proactively identified and resolved namespace issues with restricted OmniStudio components, converting them to Lightning Web Components, enabling modular use around the org.
- Redesigned API responses with MuleSoft engineers, reducing package size by 15% to optimize network efficiency and speed.
- Enhanced UX by implementing dynamic language labels that seamlessly transitioned between French and English based on individual user preferences.
- Received the Star Developer Award for this multi-cloud project that earned a 5/5 CSAT score.

SKILLS

Languages / Frameworks:	JavaScript, Lightning Web Components, Apex, Java, SOQL, SQL, React (React.js)
AI Tools:	Cursor, Claude, Gemini, GPT
Platforms & Tools:	Salesforce, Sales/Service/Experience Cloud, OmniStudio, Vlocity, Copado, Flosum, Jenkins
Salesforce Certifications:	Administrator, Agentforce Specialist, AI Associate, Data Cloud, JavaScript Developer, OmniStudio Developer, Platform App Builder, Platform Developer, Service Cloud, Vlocity Health

EDUCATION

Western Governors University - B.S. in Computer Science — 2025 - Present

App Academy - Certificate in Full Stack Web Development — 2021

Binghamton University (SUNY) - B.S. in Finance and Marketing — 2012
